

# POLIRACKS

This is an extensive and versatile range of 500mm by 500mm plastic dishwasher baskets for washing and storing glassware, crockery and cutlery.

## *Standard baskets*

Plate, cutlery, tray and open baskets for cups & glasses. Open baskets are the base for a very flexible range of extenders and inserts. Cutlery baskets have a close mesh base, so that items of cutlery can be laid flat without falling through the base.

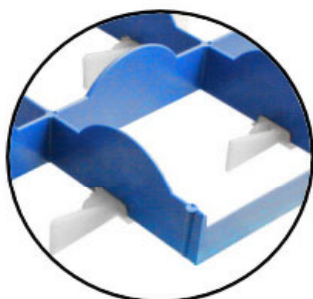

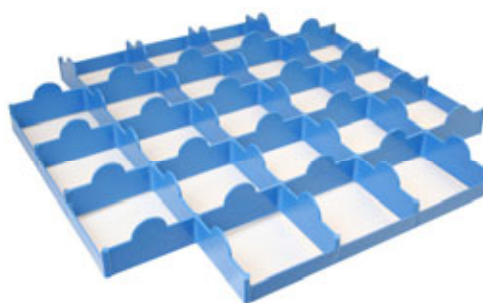

## *Height extenders*

These can be added to the base basket for tall items. Each extender adds 40mm to the height of base basket. Extenders are supplied separately and can be easily and permanently snapped onto the base basket, building to the desired height.

## *Base divider inserts*

These can be placed in the basic basket to separate items such as cups, bowls and glasses, to avoid scratching and breakages. They come in 5 compartment sizes, 9 (for bowls and large glassware such as steins), 16, 25, 36 and 49 compartments to suit your glass size. See chart for maximum glass sizes.

## *Polirack incliners*

Incliners can be added to your base dividers. These tilt the cups, bowls or glasses, so the rinse water runs off the base. This avoids staining on the base of these items when the water dries out, which spoils their appearance and requires further manual cleaning.

## *Drip Trays*

Used to prevent water from your recently washed items and racks dripping onto your floor, becoming a health hazard and another mess to clean up.

Example of a pint glass and incliner

### ***Divided Glass Baskets***

Delicate glassware, particularly stemware, is more likely to be scratched or damaged in an open basket, and may need more careful treatment.

The divided glass baskets have been designed for this purpose. They are often used for safe storage of quality glassware.

The Polirack range comes in 5 sizes, from 9 to 49 compartment (see chart for maximum glass sizes). Each base glass basket has a maximum glass height of 120mm, but can be extended (see below)

Glass baskets can be supplied with or without Polirack Incliners (see above section)

### ***Divided glass basket extenders***

To each base glass basket, divided glass basket extenders can be added to increase the internal height for taller glasses by 40mm. Each extender snaps on easily and can't come undone. You can design your own style of basket, by adding additional divide extenders or use a mix of open extenders and divided ones for very tall stem ware.

### ***Transport and Storage***

#### **Trolley**

All baskets stack securely on top on one another, making storage convenient, while not in use or for stacking divided glass baskets. Trolleys are available to transport baskets and they are supplied with or without handles.

#### **PVC cover**

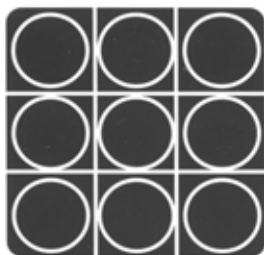

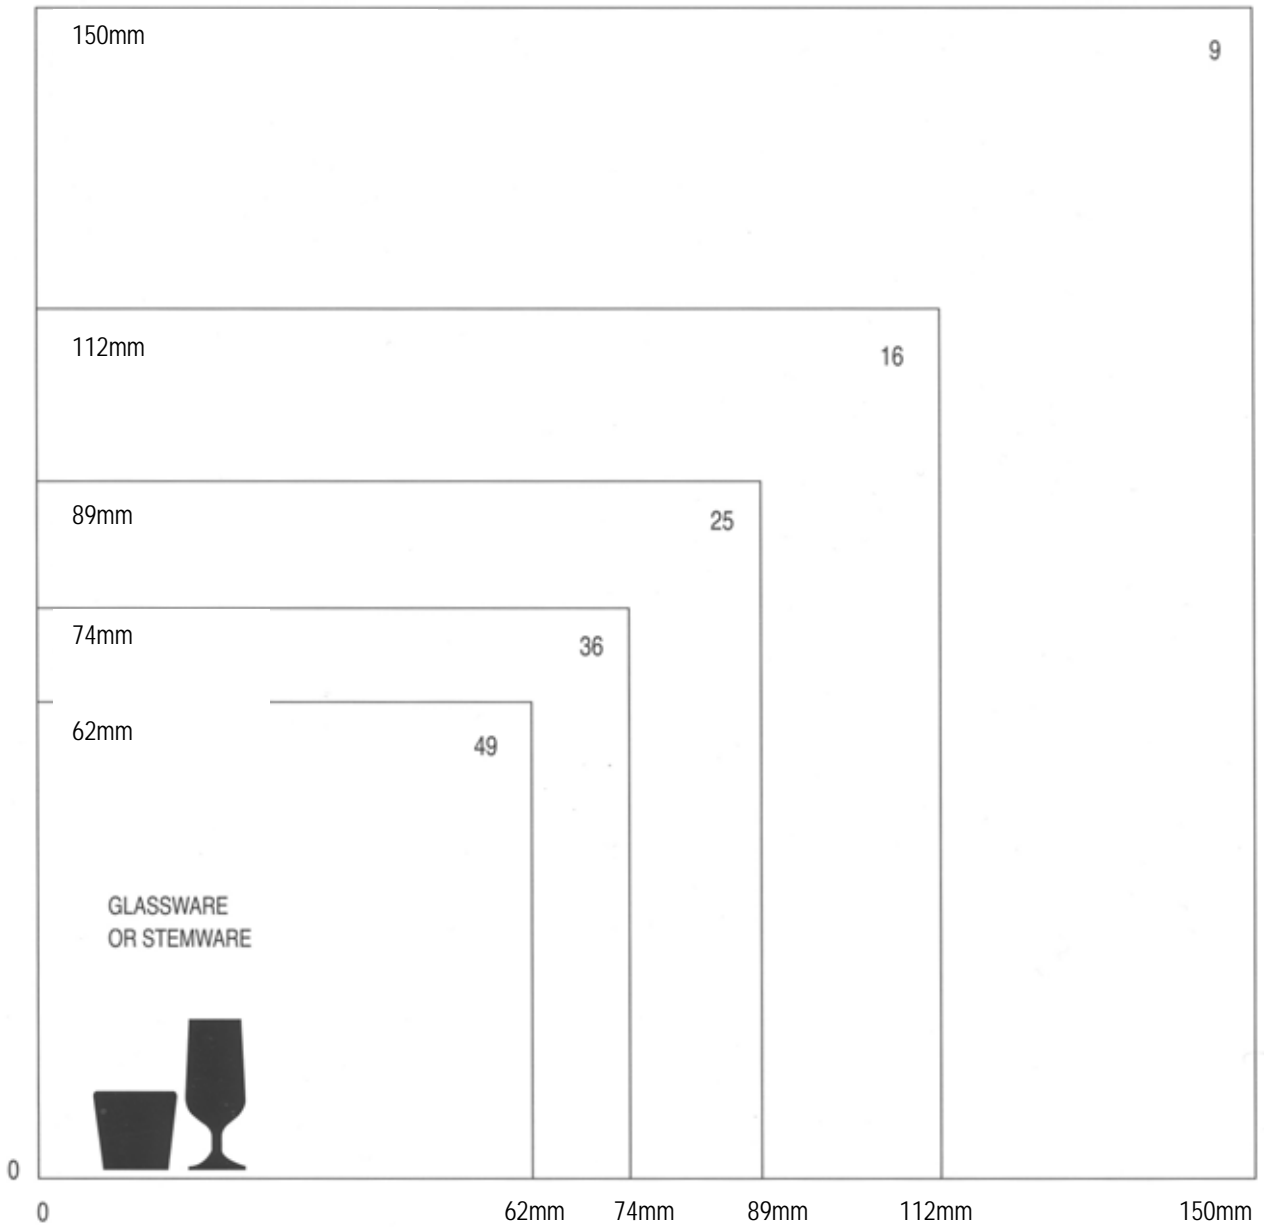

Keep dust, splashing liquids and anything else off your glassware with a PVC cover that fits easily over the poliracks.

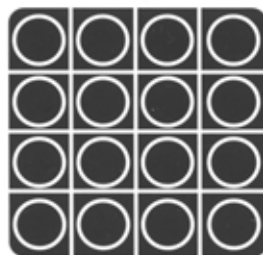

### ***Cutlery Inserts***

Polirack also offer a range of cutlery inserts, round, square and compartmented, for inserting into the base rack. Separates cutlery for easy sorting or to protect delicate cutlery during washing.

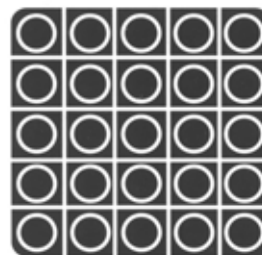

# DIVIDED BASKET COMPARTMENT SIZE CHART

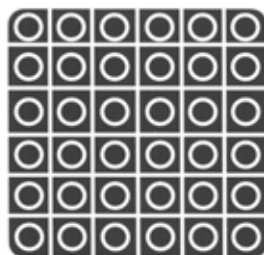

3x3  
15x15 cm

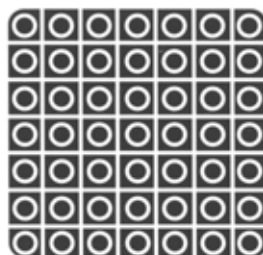

4x4  
11.2x11.2 cm

5x5  
8.9x8.9 cm

6x6  
7.4x7.4 cm

7x7  
6.2x6.2 cm

You can use this page to measure what type of Polirack divider will suit your glassware best. Just print it out at 100%, and see which box your glasses fit into in the graph above. Some resizing may occur due to printer settings, so please check dimensions are correct.
